

Mustafa Al-Azzawe

FRONTEND DEVELOPER & DESIGN ENGINEER

Toronto, Ontario, Canada | (647) 996-3754 | mustafa.alazzawe@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Frontend developer and design engineer with a background bridging design and development — from Figma prototypes through to production-ready React applications. Experienced building scalable component libraries, accessibility-compliant interfaces, and data-driven products in fast-paced startup environments.

SKILLS

Frontend: React, React Hooks, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, JSX
Design & Accessibility: Figma, Responsive Design, Mobile-First, WCAG/AODA standards
State Management & Performance: Redux, Zustand, Angular Signals, React optimization (memoization, lazy loading, code splitting)
Build Tools & Testing: Webpack, Vite, NPM, Yarn, NodeJS, JEST, Git
Backend & APIs: RESTful APIs, GraphQL, Spring Boot (Java), Flask, FastAPI, Firebase (Firestore, Auth, Hosting), PostgreSQL, Auth0
Cloud & DevOps: Google Cloud Platform (GCP), Docker, CI/CD, GitHub Actions, Render

EXPERIENCE

HUMRA Toronto, ON, Canada
Contract Design Engineer & Product Consultant November 2025 - Present

- Contributed to product direction and design decisions as an embedded consultant — spanning UX, branding, and platform strategy
- Architected a multi-screen registration and assessment flow with a real-time admin dashboard, real-time match reveal, and a research-based compatibility algorithm informed by Gottman Institute findings
- Shipped to production for live events — 94% match rate among assessment respondents at debut event

Everything in Creation Toronto, ON, Canada
Co-Founder & Design Engineer June 2024 - Present

- Conducted end-to-end UX process for client rebrands — competitive analysis, wireframing, and iterative Figma design rounds through to implementation
- Restructured site architecture and consolidated service offerings to reflect clients' strategic positioning and target markets
- Rewrote and optimized website copy with a benefit-driven, scannability-first approach across homepages, service pages, and SEO metadata

3D CityScapes / NTRY GTA / MetaWorldX Toronto, ON, Canada
Software Developer — connected group of architectural visualization startups September 2021 - June 2024

- Developed React TypeScript applications for performance-critical 3D visualization, leveraging advanced optimization techniques.
- Built reusable component libraries translating Figma designs into production code, collaborating with UX designers and architects on software architecture
- Implemented state management with React Context API and Redux, with responsive mobile-first design patterns ensuring accessibility compliance

PROJECTS

Pivot Draft [Live Preview](#)

- Full-stack NBA fantasy draft strategy tool with a real-time punt-strategy-aware ranking engine.
- Built Angular TypeScript frontend with signals-based state management, real-time data visualization, an accessibility-compliant player board, and a reusable component design system
 - Engineered a Java Spring Boot backend with a z-score ranking pipeline, PostgreSQL persistence, Auth0 authentication, and a CSV admin data pipeline — deployed via Docker and GitHub Actions CI/CD to Render

Devil Fruit Database [Github Repo](#) | [Live Preview](#)

- Full-stack React and Python application demonstrating end-to-end development, API integration, and cloud deployment.
- Developed responsive React TypeScript frontend using modern React patterns, hooks, and styled-components with mobile-first responsive design
 - Built RESTful API integration with comprehensive error handling and asynchronous data management, deployed to GCP using Docker containerization and GitHub Actions CI/CD

EDUCATION

Ontario Tech University September 2016 - September 2021
BSc in Computer Science (Honours)
